Backlit Solutions

Choosing your backlit exhibition solution is a piece of cake!

SHADOW FREE DOUBLE SIDED ILLUMINATION

Enjoy the flexibility of double sided LED exhibition technology

Double the graphics - Double the impact. **BrightWall 108** provides stunning double sided backlit graphics to showcase your message to a larger audience. Featuring smooth, channel free finish on all profiles and minimum aluminum extrusion showing.

FRONT

SINGLE SIDED LIGHTER & THINNER

When footprint and weight are a consideration, think **BrightWall 80**

Featuring the same backlit LED technology as BrightWall 108, **BrightWall 80** setup is simple. The brightness of graphics is exactly as what you expect from all our backlit solutions and you get all of this in our most lightweight aluminum profile yet.

MODULAR BACKLIT COUNTERS

BrightWall backlit counters are more than just an exhibition accessory

Stand out from the crowd at busy retail, exhibition or sales events with our **BrightCounter** range. Maximise the impact with our double width BrightCounter and tailor it to your needs with our range of colours and accessories.

Scalable

Take your company's message to new heights!

All our BrightWall backlit display walls are available in 3 standard heights 2.36m, 2.5m and impressive 3m high units

Whatever your needs or budget, be safe in the knowledge that there is a **Nomadic Display** solution that is just right for you and can grow with your future exhibition requirements.

Integrate our 2.36m backlit units with your existing **Nomadic Display** products, stand eye to eye with other exhibitors showing 2.5m high stands or soar over them with our impressive 3m high units.

2.36m

2.5m

3m

3m

2.36m

Purchase a 2.36m unit and know that, based on the unique modularity of the range, this purchase can scale up in height to 3m.

Modular

Some things work better together!

Pre-drilled

All BrightWall walls are pre-drilled on both sides of the display, so that you can join multiple walls together to create a bigger impact.

All drilled holes are covered with plastic hole caps which can be easily removed when reconfiguring stands or growing designs.

Versatility

Combine frames together to create different size spaces and shapes

Add walls and accessories together so your display goes from a single wall to a complete design solution.

BRIGHTNESS THAT IS OUT OF THIS WORLD!

**High quality backlit
LED technology that
presents your message
in the best light**

A high level of brightness and an even illumination makes **BrightWall** the champion of illuminated exhibition displays. Choose from 80mm single sided and 108mm double sided displays, or accessorise with our range of modular backlit counters. Set up decorative focal points or combine several modules for larger, illuminated displays.

**Choose BrightWall Backlit Display Walls and
Counters as your complete backlit LED solution**

FEATURES

Portable

BrightWall display walls are lightweight, compact and easy to transport. Each display comes in a wheeled case providing exceptional protection for your **BrightWall** display.

Durable

All our **BrightWall** products are designed and constructed to the same high **Nomadic Display** standards we have been delivering for over 45 years. This is shown through our industry leading lifetime warranty. **BrightWall** features high-powered LED lights that are long lasting and have a lifetime of up to 10,000 hours.

Ease of set up

Easy to follow, tool-free set-up allows you to assemble your **BrightWall** in as little as 15 minutes. Plug and play lights ensures a simple, stress free set up every time. A comprehensive selection of setup videos and support material is also available.

Versatile

Reconfigurable designs that can scale up or down as your exhibition needs change are a trademark of **Nomadic Display**. Our backlit solutions range embraces the same concept and ensures your investment provides maximum flexibility and value for money. Refresh and update your existing purchases with new LED backlit technology knowing that the entire range of **Nomadic Display** products will integrate with your existing products.

Economical

Our **BrightWall** displays are easily adapted to your ever-changing marketing message with their interchangeable, crease resistant, dye sub printed SEG fabric. LED lights are six times more energy efficient than conventional lights and can cut energy use by up to 80%.

SINGLE SIDED CORNER DISPLAYS

BrightWall 80 corner solutions feature a range of sizes specifically designed to fit your floor space. The smaller footprint of the **BrightWall 80** profile maximises your usable floorspace.

DOUBLE SIDED CORNER DISPLAYS

BrightWall 108 corner solutions combine units together in a 90 degree corner to create unique double sided solutions. Choosing the right **BrightWall** solution is a piece of cake.

Designed to fit into your exhibition floor space,
Brightwall backlit solutions allow for ultimate flexibility
